ROUTE TO MODERN DATA PLATFORM

STAGE 2 – LET'S ARCHITECT

θtheta

Completed **STAGE 1 – LET'S ASSESS** of our route to Modern Data Platform?

STAGE 2 - LET'S ARCHITECT is where our data specialists develop your optimal Modern Data Platform reference architecture.

INCLUDES:

> Workshops with key stakeholders to gain a full understanding of your requirements.

> Detailed analysis and design of your Modern Data Platform, including security considerations.

DELIVERABLES:

> Value proposition.

> An in-depth reference architecture detailing technology, services and integrations.

> Total cost of ownership for the first 3 years.

> Quick wins.

BENEFITS:

✓ A custom data architecture that meets your current and future needs.

✓ A flexible, scalable solution that supports your integrations.

✓ Lay the foundations for a long-term business adoption strategy.

TIME FRAME

2 – 3 weeks

CASE STUDY

From SQL Server-based data warehouse to Modern Data Platform, the Electricity Authority has reduced 'time to insights' from hours to minutes.
